Chameleon 4 TIR Dual Color LED Traffic Advisor Light Bar Wiring and Installation Guide

For the best effectiveness, we recommend you have The Chameleon 4 LED traffic advisor installed by a certified emergency vehicle technician. **EVTs are certified to maintain, install, and repair emergency vehicles and equipment. It's important to remember that improper installation of this light can result in damage to your [emergency vehicle, light](#), or cause serious injury.**

Tips to Wire the Chameleon 4

- Use grommets, looms, or cable ties to anchor and protect wires
- Wire splices can increase voltage drops
- Wires near vehicle hot spots can reduce carrying capacity of wires, fuses, and circuit breakers
- Red wire connects to positive terminal on pre-existing switchbox
- Black wire connects to ground
- When installed, the cable should exit the emergency light on the driver's side of the vehicle
- Check to make sure there are no obstructions that hinder the effectiveness of the light

Chameleon 4 Mounting Tips

- Install suction cup brackets
- Install suction cups
- Mount light on interior of vehicle
