## LED Hideaway 9 Installation and Wiring Instructions

We recommend these [emergency lights](#) are installed by an EVT. EVTs are certified to install, repair, or maintain emergency vehicle equipment. Below, you will find instructions on how to install or repair these lights.

### Important Installation and Wiring Information for LED Hideaway 9

- Do not cut the wire between the in-line flasher and lighthouse
- Hideaways should only be used on approved vehicles
- Don't install or route wires near airbag deployment areas
- Consult vehicle manufacturer's wiring diagram before proceeding with install or wiring to prevent damage

### Installation Instructions

1. Remove taillight or headlight reflector assembly (follow vehicle manufacturer's instructions)
2. Choose a flat hideaway location with a 1" clearance that won't interfere with lamp operation. The hideaway location you choose should be as close to the focal point as possible.
3. Drill a 1" hole in reflector housing with a hole saw
4. De-burr hole
5. Place hideaway in drilled hole
6. Mark mounting locations
7. Install light using included hardware (only use approved hardware)
8. Complete wiring (wiring instructions below)
9. Re-install light's reflector assembly

### Wiring Hideaway 9 LED lights

Step 1: Power the hideaway 9 by connecting the red wire to the positive terminal of a switching source, and the black wire to the ground source such as the negative battery terminal or chassis ground.
